VITALI CHAIR

VITALI CHAIR

Smart dining chair with the approach of analyzing user health data.

Intelligent seating for a healthier you.

Vitali Chair is a smart dining chair designed to inform users about their physical factors and provide an interface for analyzing health data.

The chair would incorporate sensors and technology to measure and track data such as BMI index, fat content, muscle mass, and basal body metabolic rate.

FEATURES OF VITALI CHAIR:

- User weight monitoring
- Monitoring user BMI conditions
- Specialized BIA computing
- Recording pulse rhythm and blood oxygen levels
- Providing daily reports of the nutrition program and the user's health level
